ELSEVIER

European Journal of Operational Research 91 (1996) 640–642

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 91

1 Perturbation analysis of discrete event systems: Concepts, algorithms, and applications (Invited Review)
X.-R. Cao

14 Visual interactive modelling: A pictorial simulation specification system
G. Au and R.J. Paul

27 The Analytic Hierarchy Process in an uncertain environment: A simulation approach
D. Hauser and P. Tadikamalla

38 Dynamic control charts for finite production runs
G. Tagaras

56 Modeling and analysis of machine sharing in manufacturing systems
S. Benjaafar

74 Joint replacement in an operational planning phase
R. Dekker, R.E. Wildeman and R. van Egmond

89 Alternate approaches to solving the Holt et al. model and to performing sensitivity analysis
J. Singhal and K. Singhal

99 An exchange heuristic imbedded with simulated annealing for due-dates job-shop scheduling
Z. He, T. Yang and A. Tiger

118 V-shape property for job sequences that minimize the expected completion time variance
X. Cai

124 Search heuristics for a flowshop scheduling problem in a printed circuit board assembly process
Y.-D. Kim, H.-G. Lim and M.-W. Park

144 Variants of the Two Machine Flow Shop Problem connected with factorization of matrix functions
H. Bart and L.G. Kroon

160 A fast tabu search algorithm for the permutation flow-shop problem
E. Nowicki and C. Smutnicki

176 Sevast'yanov's algorithm for the flow-shop scheduling problem
H.R. Lourenço

190 Single-machine scheduling with time windows and earliness/tardiness penalties
C. Koulamas

203 Solution of the generalized Townsend single machine scheduling model
W. Szwarc and S.K. Mukhopadhyay

Feature Issue: Financial Modelling

211 The virtual reality of financial-economic decision making
E. Castagnoli and J. Spronk

214 A lattice approach for pricing of multivariate contingent claims
N. Ekvall

229 A class of options with stochastic lives and an extension of the Black–Scholes formula
L.P. Jennergren and B. Näslund

235 Fixed income linked life insurance policies with minimum guarantees: Pricing models and numerical results
A.R. Bacinello and F. Ortu

250 Transaction costs and efficiency of portfolio strategies
A. Pelsser and T. Vorst

264 Robust optimization models for managing callable bond portfolios
C. Vassiadou-Zeniou and S.A. Zenios

274 Managing a value-preserving portfolio over time
T. Wiesemann
284 Speculative dynamics with bounded rationality learning
E. Barucci and L. Landi
301 Imitation and stability in a stock market
M. Cenci, A. Cerquetti and L. Peccati
330 Restyling of fees in consumers credit and their optimization
C. Battaglio, G. Longo and L. Peccati
346 Call for Papers

347 On the use of the complexity index as a measure of complexity in activity networks
B. De Reyck and W. Herroelen
367 Maximizing the production rate in simple assembly line balancing – A branch and bound procedure
R. Klein and A. Scholl
386 Capacity planning in manufacturing and computer networks
K.M. Bretthauer
395 A heuristic approach for capacity expansion of packet networks
A. Dutta and Y.K. Kim
411 Optimal allocation and backup of computer resources under asymmetric information and incentive incompatibility
H.K. Cheng, M. Freimer, W.B. Richmond and U. Sumita

427 Mathematical models of service (Invited Review)
R.T. Rust and R. Metters
440 Service level approximations for multiechelon inventory systems
E.P. Chew and L.A. Johnson
456 A forward branch-and-search algorithm and forecast horizon results for the changeover scheduling problem
J.D. Blocher and S. Chand
471 The complexity of a cyclic scheduling problem with identical machines and precedence constraints
A. Munier
481 An analytic formula for the mean throughput of *K*-station production lines with no intermediate buffers
H.T. Papadopoulos
495 Locating flow-capturing units on a network with multi-counting and diminishing returns to scale
I. Averbakh and O. Berman
507 Postoptimizing equilibrium flows on large scale networks
S. Nguyen, S. Pallottino and D. Inaudi
517 Optimal lot-sizing in an imperfect production system with homogeneous reworkable jobs
J.J. Liu and P. Yang
528 Joint price and lot size determination under conditions of permissible delay in payments and quantity discounts for freight cost
S.W. Shinn, H. Hwang and S.S. Park
543 The solution of two-stage guillotine cutting stock problems having extremely varying order demands
J. Riehme, G. Scheithauer and J. Terno
553 A recursive exact algorithm for weighted two-dimensional cutting
M. Hifi and V. Zissimopoulos
565 A heuristic algorithm for the mini-max spanning forest problem
T. Yamada, H. Takahashi and S. Kataoka
573 A new subtour elimination constraint for the vehicle routing problem
N.R. Achuthan, L. Caccetta and S.P. Hill
587 Price-directive decomposition applied to routing in telecommunication networks
F.G. Ayllón, J. Galán, A. Marín and A. Menéndez
600 Relaxation heuristics for a generalized assignment problem
L.A.N. Lorena and M.G. Narciso
611 Geometric three-dimensional assignment problems
F.C.R. Spieksma and G.J. Woeginger
619 A polynomially solvable class of Quadratic Semi-Assignment Problems
F. Malucelli

623 Partially-linear transportation problems
C.A. Dangalchev
634 On the dual of linear inverse problems
P. Kas and E. Klafszky
640 Contents Volume 91
